

A Internal predictive performance

Matched resampling (not compute matched); PCA used 5 × 5

- Matched-resampling no selection
- Held-out test
- Nested CV mean $\pm$ SD
- Fold-local PCA mean $\pm$ SD

Binary classification

Multiclass classification

Regression

Survival

Primary metric (balanced accuracy, R^2 , or C-index)**B Feature-set stability**

Across 50 outer folds

Binary classification

Multiclass classification

Regression

Survival

Mean pairwise Jaccard

C Computation time

Single process, Windows test environment
